

At PROLIM Government technologies we provide a wide range of support services to the Federal Government, Aerospace OEM's, Space, Military and Defense, Shipbuilding, Automotive and Alternative Energy industries. This includes engineering (CAD/CAM/CAE), manufacturing, Product Lifecycle Management (PLM), plant floor technology, and Supply Chain Management. We utilize our direct resources, industry partners, and affiliations to successfully execute and complete contract requirements. This is the value of working with a business integrator.

## Government Services

---

We have a dedicated practice in servicing government entities.

- **US Military**
- **Defense**
- **Homeland Security**
- **State Government**

We develop and implement human capital management solutions for both projects and ongoing human resource needs.

- **Outsourced HR**
